

AMERICARE SERVES CORPORATIONS

Immediate Care with a Personal Touch.

Companies across America are facing monumental challenges: rising health care costs, increased medical-related absenteeism, and treatment delays resulting in lower worker productivity and diminished enterprise profitability. Americare is the single service source where employers and employees can minimize all these challenges while also improving the quality of their medical care.

Call RN™ Is On-Call To Resolve Health Issues

Call RN Centers are staffed with experienced, registered nurses licensed to practice in the United States. They provide employees with non-emergency medical advice, collect medical history information for doctors, and serve as the central point of contact for maintaining employee electronic medical records. The nurses:

- Monitor a 24/7/365 medical hotline that employees can call while at work
- Communicate employee needs to Call MD physicians
- Update private employee electronic health records
- Coordinate medical and non-medical electronic data storage transfers
- Custom wellness programs to help members manage specific health challenges such as diabetes, high cholesterol, smoking, cancer and heart disease

Call MD™ Provides Medical Care On The Phone

Employees with non-emergency related illnesses talk to a physician without leaving the office. **Call MD's** nationwide network of physicians are available for all employees via a designated 800 number. The physicians:

- Review medical data collected by Call RN nurses
- Provide medical advice for employee and employer in 10-minute consultation sessions
- Issue non-narcotic prescriptions (where allowed and when sufficient medical history is available)

File MD™ Expedites Medical Treatment

Now employers can further safeguard their employees by using the **File MD** electronic health records storage service. Employees' HIPPA-compliant medical history is safely stored and instantly accessible. **File MD:**

- **Manages employee personal health records (PHR) in one location**
- **Ensures approved physicians have instant access to employee password-protected medical files for accurate treatment**
- **Minimizes on-the-job employee risk by ensuring immediate responder success in an emergency**
- **Automated administration reports for members to ensure compliance with medical standards and to track statistics such as immunization renewals**

Docs SERVE™ Manages Employee Documents

This comprehensive service extends beyond **File MD's** electronic medical records to include other various document services. This includes files such as court proceedings, family wills, insurance records, adoption papers, birth certificates, and criminal history. The service, ideal for individuals or employees, includes:

- **Secure non-medical document storage**
- **A 24/7/365 on-call nurse hotline for data retrieval**
- **Secure medical record transfer**
